

CVM Developer

TAP

LockBox

Owned Keys & Data:

1. Symmetric Key
2. Expected Measurement & Developer Secrets
3. Device Public Keys (from target RoTs)

1. TAP Encapsulation

1 Encrypt (Measurement + Secrets) using **Symmetric Key**

Generates single encrypted TAP
(Environment-independent)

2. LockBox Encapsulation

loop

[For each target device]

2 Encrypt (**Symmetric Key**) using **Device Public Key**

Generates specific LockBox
bound to hardware platform
